

PRISONER TRANSPORT SYSTEM

Seat & Floor Pan

The **Ibis Tek Specialized Vehicles (ISV)** Prisoner Transport System (PTS) helps eliminate the length cleanup often required after prisoner transport. Molded of high-density polyethylene or ABS, the PTS is highly durable. The one-piece seat design eliminates areas for hiding contraband and the optional seat belt extensions make it easier to secure prisoners. The floor pan includes two drain plugs that allow for fast, safe, and easy clean up, putting your vehicle back on the road in less time.

Seats are available in black, gray, or white for the Ford Crown Victoria, Dodge Charger, and Chevrolet Impala. The optional floor pan is currently available for the Crown Victoria only. Custom-fit available for other vehicles upon request.

- **One-piece design** eliminates contraband hiding spaces
- **Resists scratches**, stress cracks, and extreme temperatures
- **Does not retain odors**
- **Won't break down over time**
- **Floor-pan drain plugs** for fast and efficient cleanup
- **Seat belt extensions** available
